In Our Prayers

Breann & Barry are in Chicago for Bree to try a different type of medicine for her continued migraines. She developed numbness on her entire left side last week. Dr's at Scottish Rite feel it was a continued side effect from her headaches.

Betty Guthrie is recovering from a stroke she had last week. Dr.'s have also found a spot on her brain. She is James Barr's grandmother.

Nancy Milko continues to take chemo for a very rare and dangerous cancer.

Jenny Bailey is recovering from surgery she had for her broken ankle.

Vercel Miller will be having surgery on April 6th.

Irene Gorman is recovering from surgery for a broken wrist.

Phil Hinton is back at home recovering from hip surgery.

Winston Rhodes is in Erlanger recovering from open heart surgery.

Justin Elliott, a local young man, is under treatment for a brain tumor.

We extend our sympathy to the family of Julia Lowe in her passing away. Ms. Lowe is Robert Wood's mom. Her funeral is today from Ponders Funeral Home in Dalton.

We hope everyone has May 15th-18th marked on their calendar for our upcoming Friends Day and Lectureship.

Fatal Exposure

The Fukushima Dai-ichi nuclear power plant in Okumamachi, Japan, continues to be the focus of great concern after the magnitude 9.0 earthquake occurred on March 11. Oren Dorrel of USA Today explains the effects to the plant which pose dangers to others: "The earthquake knocked out electricity to the plant, which houses six nuclear reactors, and its cooling system.

The tsunami that followed wiped out diesel generators that provided backup power to the systems. Without electricity to operate pumps that keep water flowing over the nuclear fuel, water in the reactor cores and spent fuel pools boiled away, exposing the fuel, which melted and caught fire. That caused hydrogen explosions and released radiation, which has shown up in drinking water, food and industrial goods exported to other countries." Radiation can cause illness and even death in the event of overexposure.

Ever since the destruction caused by the earthquake and tsunami, brave plant workers, subcontractors, defense troops, and firefighters have risked their lives hooking up new power lines and getting water to the reactor cores to try to cool them. These workers have become heroes to many in Japan and throughout the world.

"Anybody that voluntarily enters a situation that puts [his life] on the line can be called a hero, and those workers certainly meet that definition," says David Lochbaum, director of the nuclear safety project for the Union of Concerned Scientists. One reason that these workers are at risk is due to possible radiation exposure. They wear protective clothing and radiation meters to prevent overexposure, but the threat remains very real.

The actions of these heroes remind us of Another who risked and gave His life to save the lives of others...

About two thousand years ago the Son of the living God walked directly into SIN's most concentrated radiation, allowed Himself to be touched by its curse, and let it take His life. But by that act, He broke the power of sin.

On the cross, "He (God) made Him (Jesus) who knew no sin to BE SIN for us, that we might become the righteousness of God in Him" (2 Corinthians 5:21). His atoning sacrifice is the means by which we may be reconciled to God (2 Corinthians 5:18-21). "He himself bore our sins in his body on the tree, so that we might die to sins and live for righteousness" and "by His wounds," we may be healed (1 Peter 2:24). He died for us so that we might live.

Although we have been **separated** from God due to our sin (Romans 3:23), through Christ we may be **reconciled** to God when we accept His offer of salvation on His terms!

Sin's "radiation" places us in danger of the "second death" (Revelation 21:8). But through Jesus, we can be made whole and have eternal life (Rom 6:23). Won't YOU accept His offer on His terms?
